## UNITED STATES HIGHLIGHTS

**All hay** stored on United States farms as of December 1, 2017 totaled 86.2 million tons, down 10 percent from the previous December. Disappearance from May 1, 2017 - December 1, 2017 totaled 69.6 million tons, compared with 64.3 million tons for the same period a year earlier.

The majority of the eastern States reported higher stocks compared to the previous year due to a higher production. Meanwhile, among States west of the Mississippi River, only Colorado and Wyoming had higher stocks than in 2016.
